STATE OF FLORIDA
MENTAL HEALTH PROGRAM OFFICE
STATISTICAL REPORT OF HOSPITALS
FOR FISCAL YEAR ENDED JUNE 30, 1979

INTRODUCTION

This is the eighteenth annual report of statistics concerning patients served by the state mental health hospitals, since the statistical program was implemented on July 1, 1961. In addition to the operation of mental hospitals, the support and development of community mental health facilities has been an added function of the Mental Health Program Office since July 1, 1965.

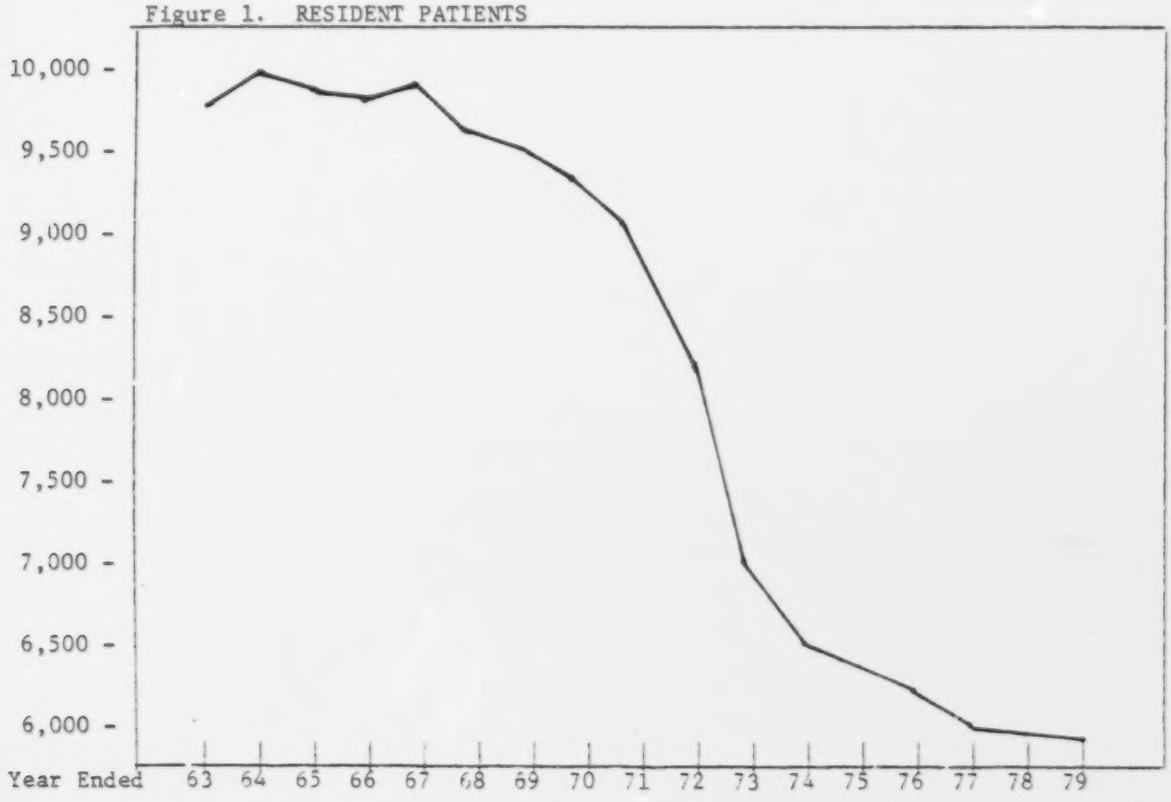
PATIENT DATA

The relative size of the four mental health hospitals may be seen in the average daily census of each during the past fiscal year.

Florida State Hospital Chattahoochee	2004
G. Pierce Wood Memorial Hospital Arcadia	1170
South Florida State Hospital Hollywood	1273
Northeast Florida State Hospital Macclenny	1133
TOTAL	5580

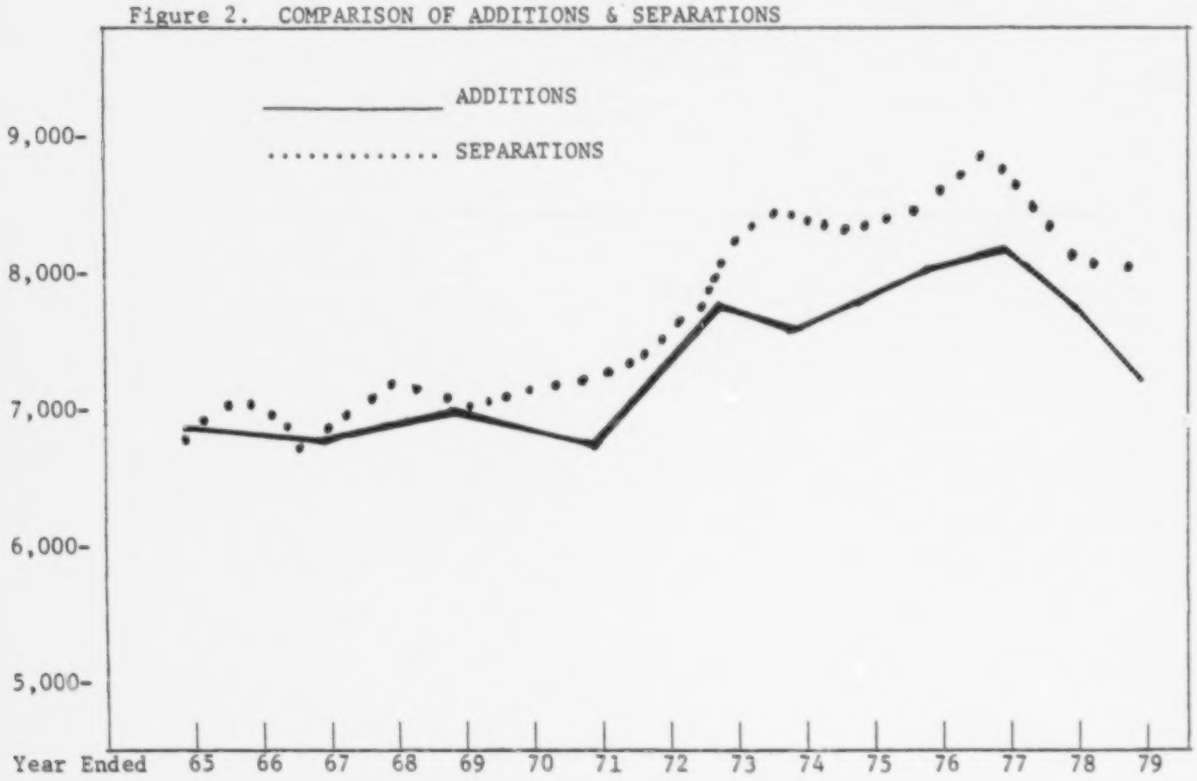
The resident population at the end of 1978-79 was 5393. The rate per 100,000 civilian population was 60.1. It may be noted that a decrease began soon after the community mental health program began in 1965.

Figure 1. RESIDENT PATIENTS



The number of additions to the hospitals this fiscal year (7229) was slightly lower than the number of additions last year (7408). The number of separations (7509 in 1978-79) was also lower (7622 in 1977-78). See Figure 2 for comparison of additions and separations for the past 15 years.

Figure 2. COMPARISON OF ADDITIONS & SEPARATIONS



In reading these data, one precaution is needed. There are some duplicated counts. For example, if a patient is discharged and readmitted in the same year, he is tallied as both a discharge and a readmission.

SEX

In the resident patient population at the end of the reporting period, there were 2444 females and 2949 males, a ratio of 120.7 males for each 100 females. These figures show that there was a slight increase in the ratio of males since the beginning of the period (115.5 males for each 100 females).

The data on first admissions also showed some variation as a function of sex. During the present period, 189.5 males per 100 females were admitted for the first time. Readmissions were 170.5 males per 100 females. With reference to admissions overall, there were 178.8 males admitted for each 100 females admitted.

The variation in data as a function of sex may be observed in the following chart:

	MALE	FEMALE	MALES PER 100 FEMALES
All Admissions	4364	2441	178.8
First Admissions	2232	1178	189.5
Readmissions	2132	1263	170.8
Discharges from Resident Population	3849	2174	177.1
Discharges from Leave	384	288	133.5
Placed on Leave	536	335	160.0
Return from Leave	249	144	172.9
Patient Population:			
At Beginning of Year	3040	2633	115.5
At End of Year	2949	2444	120.7
On Leave:			
At Beginning of Year	206	157	131.2
At End of Year	109	60	181.7

COUNTY OF RESIDENCE

Total admissions to all state mental health hospitals was 6805. The rate of admission of the entire state was 75.9 per 100,000 population but there was a considerable variation in rates between counties. The admission rate for 15 counties, which had a population under 15,000 was 56.0 per 100,000; the rate for 32 counties whose population was between 15,000 and 100,000 was 65.2 admissions per 100,000, and the rate for the 20 counties with over 100,000 population was 78.0 per 100,000.

POPULATION OF COUNTIES

	ALL COUNTIES	UNDER 15,000	15,000-100,000	OVER 100,000
Population	8,966,365	133,940	1,263,688	7,578,767
Admissions	6,805	75	818	5,912
Rate per 100,000 Population	75.9	56.0	65.2	78.0

AGE

The distribution of admissions by age group shows the age of 20-34 to be the most frequent group 48.5% to which admissions fall. The 65 and over age group accounted for about 8.1% of admissions.

TYPE OF MENTAL DISORDER

Of the 6805 patients admitted during the year, 58.2% were diagnosed as having schizophrenic reactions. Of all of the diagnostic categories, schizophrenics were found to be the most prevalent in all phases of hospitalization. The table following depicts the frequency of schizophrenics in those varisou phases.

Of the total number of schizophrenic patients admitted, 56.7% were readmissions reported to have had a record of prior admission to some inpatient mental health facility.

	TOTAL	NUMBER DIAGNOSED AS SCHIZOPHRENIC	PERCENT
All Admissions	6805	3963	58.2%
Hospital Residents	5393	2616	48.5%
Direct Discharges	6023	3136	52.1%
Placed on Leave	871	482	55.3%

It is intended that the annual statistical report will serve as a useful instrument for administrative, clinical, and scientific purposes. The information provided herein may be used as a basis for studying the effects of various programs, changing patient characteristics, staff utilization, etc.

DEFINITIONS

RESIDENT PATIENT POPULATION: Patients physically present in the hospital at a given point in time, plus those patients who are permitted to leave the hospital on temporary visit (period not exceeding 10 days).

TOTAL PATIENTS SERVED: Includes Resident Patient Population at the beginning of a specified period of time plus all Additions (See below) to the hospital during that period of time.

SEPARATIONS: Patients who are no longer physically present in the hospital as a result of being Directly Discharged (See below), Placed on Leave (See below), Transferred to Books of Sunland Training Center or Deceased.

ADDITIONS: Patients who have been Admitted (See below) with or without a record of prior admission to an inpatient facility or patients who have been transferred in from Books of Sunland Training Center or who have Returned from Leave (See below).

DIRECT DISCHARGE: Discharge of patient from Resident Patient Population.

DISCHARGE FROM LEAVE: Discharge of patient from on Leave Population (See below).

PLACED ON LEAVE: Patients carried on the books but absent from the hospital for one of the following reasons:

A. Convalescent Status - An authorized absence from the hospital for more than 10 days for the patient to test his ability to adjust to normal community life.
B. Unauthorized Absence (AWOL) - This includes all patients on escape or elopement that are still carried on books of hospital.
C. Family Care - Placement of patients in responsible private homes, other than their own, under the supervision of the hospital.
D. Work Placement - Placement of a patient in a home other than his own with maintenance being earned by the patient by means of work in the home or an outside job. Supervision is provided by social workers of the hospital and his employer.
E. Otherwise Absent - Includes all patients who have been placed on temporary visits with the understanding that they will remain out of the hospital longer than 10 days but return on a specified date. Also includes those who have been on temporary visits for 10 days or less but who are given extensions of such visits so that the total time out of the hospital exceeds 10 days. These patients will be considered "otherwise absent" as of the date of extension.

ADMISSIONS: All those admitted to the hospital and classified in one of the following categories:

A. First Admission - No record of prior admission to a Florida Division of Mental Health Hospital.
B. Readmission - Prior admission to a Florida Division of Mental Health Hospital.
